PARTICIPANTS IN THE NATIONAL TURKEY IMPROVEMENT PLAN

2821

NATIONAL PLAN HATCHERIES NATIONAL PLAN DEALERS AND INDEPENDENT FLOCKS

Rev. Mar. 1971

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

AGRICULTURAL RESEARCH SERVICE
U.S. DEPARTMENT OF AGRICULTURE

MAY 27 1971

CURRENT SERIAL RECORDS

The National Turkey Improvement Plan became operative September 25, 1943, with the approval of the Secretary of Agriculture and under the authority of an appropriation made by Congress for the United States Department of Agriculture, to be used in cooperation with State authorities in the administration of regulations for the improvement of poultry, poultry products, and hatcheries. Authority for the administration of the Plan is now contained in the Department of Agriculture Organic Act of 1944, as amended (7 U.S.C. 429).

Provisions of the Plan are changed from time to time to conform with the development of the industry and with new information as it becomes available. These changes are based upon recommendations made at the biennial National Plans Conference by official delegates representing participating breeders, hatcherymen, and flock-owners from all cooperating States. Current regulations of the Plan are described in the U.S. Department of Agriculture publication, "The National Poultry and Turkey Improvement Plans." The publication is available from Official State Agencies or upon request to the Animal Science Research Division, ARS, Beltsville, Maryland 20705.

Information in this publication was compiled by the Animal Science Research Division, Agricultural Research Service, U.S. Department of Agriculture. Trade names are mentioned in this publication solely to provide specific information. The mention of such names does not constitute a guarantee or warranty of the product.

PARTICIPANTS IN THE NATIONAL TURKEY IMPROVEMENT PLAN

INTRODUCTION

The hatcheries, dealers, and independent flocks listed in this publication are participating in the National Turkey Improvement Plan, according to reports submitted by the Official State Agencies. The list of participants is published for the purpose of developing greater efficiency in the operation of the Plan. Additional information regarding participants may be obtained by writing to the Department or to the Official State Agency in their respective State.

This publication is revised each year because of frequent changes in participation and the need for inspectors, hatcherymen, dealers, and others to have up-to-date information. In addition, the list is corrected several times during the year by issuing supplements.

Table 1 lists the participants by States and, in addition, shows the classifications of participants' products, the contact representative, and the Official State Agency recognized by the U.S. Department of Agriculture to cooperate in administration of the Plan.

Table 2 lists, in alphabetic order by variety or type of stock, the strain or trade names of the stocks produced by the participants. The code letter and numeral used to identify each stock is also shown.

EXPLANATION FOR TABLE 1

Approval Numbers

In table 1, numerals preceding the name of the State, together with those preceding the name of each participant, constitute the participant's approval number. For example, the approval number for the first hatchery listed under Arkansas is 71-50. The No. 71 represents the State of Arkansas; No. 50, Bowen Turkey Hatchery, Route 1, Fayetteville 72701. These assigned numbers may be used by participants on shipping labels, certificates, invoices, and other documents for identification. They may also be used as reference numbers for shipments to Member States of the European Economic Community.

Hatching Egg Capacity

Figures in the column immediately after participants' names and addresses refer to the hatching egg capacity of hatcheries according to manufacturer's rating, including setting and hatching trays. Letter symbols in this column refer to products dealers sell, as follows: E, hatching eggs; P, poult; and E and P, eggs and poult.

Kinds of Stock

Turkey stock produced by NTIP participants are identified in table 1 by letter symbols as follows:

- a--Broad Breasted Bronze
- b--Other Bronze
- c--Large White
- d--Small White
- e--Other

These letter symbols are shown in the fourth column of table 1 combined with numerals, which identify the strain or trade names of participants' products. (See table 2.) Crosses are designated by combining the letter symbols and code numbers of both parent stocks, listing the male first.

All products shown in the fourth column of table 1 meet the specific requirements for a "U.S. Pullorum-Typhoid Clean" classification. Additional classifications for which these products qualify are stated in the fifth column by use of words or symbols, as follows: Approved, means "U.S. Approved"; MG, "U.S. M. Gallisepticum Tested"; T, "U.S. Typhimurium Controlled"; and None, that the products have only the "U.S. Pullorum-Typhoid Clean" classification.
